

**Mission:**

To protect, promote & improve the health of all people in Florida through integrated state, county & community efforts.

**Ron DeSantis**  
Governor

**Joseph A. Ladapo, MD, PhD**  
State Surgeon General

**Vision:** To be the **Healthiest State** in the Nation

---

**MEMORANDUM**

**DATE:** February 7, 2022  
**TO:** County Health Department Health Officers  
**FROM:** Tom Bendle  
Administrator, Immunization Section   
**SUBJECT:** Immunization Assessments Ranking Report for 2020–21

---

The Bureau of Epidemiology's Immunization Section compiled the results from four previously published immunization assessments into one easy-to-read report. Those previously published assessments are the *Kindergarten and Seventh Grade Immunization Status Report 2020–21*, *Vaccine Accountability Report January 1, 2020–December 31, 2020 (Cumulative)*, *Assessment of County Health Department Immunization Coverage Levels in 2-Year-Old Children (2020)*, and the *Survey of Immunization Levels in 2-Year-Old Children (2020)*.

The results of the individual assessments were ranked from the county with the highest percentage achieved to the lowest. For each assessment, counties listed above the double underline met or exceeded the state goal for that assessment. Counties listed below did not (Table 2).

Please contact the Immunization Section field staff representative for your county if you have questions regarding, or want copies of, the previously published assessments included in this report. For further assistance, please contact our survey and assessment consultant, Ms. Amy Wilson, at 850-901-6806.

**Abbreviations:** CHD = county health department; CY = calendar year; Deaf/Blind = Florida School for the Deaf and Blind; FAMU = Florida A&M University; FAU = Florida Atlantic University; FSU = Florida State University; Nat'l = national; N/A = Not Applicable; Sch = school; SY = school year; UF = University of Florida; WSEUF = Wasted, Spoiled, Expired, and Unaccounted For.

\*Percentage of public and private kindergarten students who met the vaccination requirement for their grade, per section 1003.22, Florida Statutes.

†Percentage of public and private seventh grade students who met the vaccination requirement for their grade, per section 1003.22.

‡Percentage of specific *Vaccines For Children Program* vaccine, at CHDs, not WSEUF.

§The ranking denominator is 36 (not 67), as 31 CHDs were excluded due to being the immunization home to ≤10 2-year-old children.

\*\*Percentage of 2-year-old children whose parents rely on a Florida CHD as their child's immunization home, who completed the 4:3:1:3:3:1:4 (expanded) vaccine series by age 24 months. The expanded vaccine series consists of four or more doses of diphtheria, tetanus toxoids and acellular pertussis (DTaP) vaccine; three or more doses of poliovirus vaccine (IPV); one or more doses of measles, mumps and rubella (MMR) vaccine; three or four doses (depending upon product type) of *Haemophilus influenzae* type b conjugate (Hib) vaccine; three or more doses of hepatitis B (HepB) vaccine; one or more doses of varicella vaccine (or physician documented disease history), and four or more doses of pneumococcal conjugate (PCV) vaccine.

††The ranking denominator is 24 (not 67), as the survey provides county-specific percentages for the 24 counties with consistently higher annual birth counts only.

‡‡Percentage of 2-year-old children (in this random sample survey) who completed the expanded vaccine series by age 24 months.

§§Not applicable, as only county-specific school districts are ranked.

\*\*\*To protect the privacy of individual students, data are not displayed for school districts with fewer than 10 students enrolled in the grade.

†††Not applicable, as this public school district offers grades kindergarten through five only.

‡‡‡Not applicable, as CHDs with 10 or fewer 2-year-old children in its immunization home are not included in the assessment.

§§§Not applicable, as the survey provides county-specific percentages for the 24 counties with consistently higher annual birth counts only.

\*\*\*\*Statewide results are weighted by the number of births in each county. County-specific results are not weighted.

<b>Statewide:</b>	<b>93.3</b>		<b>94.5</b>			<b>99.16</b>			<b>79.3</b>			<b>83.2****</b>		

**Abbreviations:** CHD = county health department; CY = calendar year; Deaf/Blind = Florida School for the Deaf and Blind; FAMU = Florida A&M University; FAU = Florida Atlantic University; FSU = Florida State University; Nat'l = national; N/A = Not Applicable; Sch = school; SY = school year; UF = University of Florida; WSEUF = Wasted, Spoiled, Expired, and Unaccounted For.

Note: Counties listed above the double underline met or exceeded the state goal.  
 \*Percentage of public and private kindergarten students who met the vaccination requirement for their grade, per section 1003.22, Florida Statutes.  
 †Percentage of public and private seventh grade students who met the vaccination requirement for their grade, per section 1003.22.  
 ‡Percentage of specific *Vaccines For Children Program* vaccine, at CHDs, not WSEUF.  
 §The ranking denominator is 36 (not 67), as 31 CHDs were excluded due to being the immunization home to ≤10 2-year-old children.  
 \*\*Percentage of 2-year-old children whose parents rely on a Florida CHD as their child's immunization home, who completed the 4:3:1:3:3:1:4 (expanded) vaccine series by age 24 months. The expanded vaccine series consists of four or more doses of diphtheria, tetanus toxoids and acellular pertussis (DTaP) vaccine; three or more doses of poliovirus vaccine (IPV); one or more doses of measles, mumps and rubella (MMR) vaccine; three or four doses (depending upon product type) of *Haemophilus influenzae* type b conjugate (Hib) vaccine; three or more doses of hepatitis B (HepB) vaccine; one or more doses of varicella vaccine (or physician documented disease history), and four or more doses of pneumococcal conjugate (PCV) vaccine.  
 ††The ranking denominator is 24 (not 67), as the survey provides county-specific percentages for the 24 counties with consistently higher annual birth counts only.  
 ‡‡Percentage of 2-year-old children (in this random sample survey) who completed the expanded vaccine series by age 24 months.  
 §§Not applicable, as only county-specific school districts are ranked.  
 \*\*\*To protect the privacy of individual students, data are not displayed for school districts with fewer than 10 students enrolled in the grade.  
 †††Not applicable, as this public school district offers grades kindergarten through five only.  
 ‡‡‡Not applicable, as CHDs with 10 or fewer 2-year-old children in its immunization home are not included in the assessment.  
 §§§Not applicable, as the survey provides county-specific percentages for the 24 counties with consistently higher annual birth counts only.  
 \*\*\*\*Statewide results are weighted by the number of births in each county. County-specific results are not weighted.
