

INTEROFFICE MEMORANDUM

DATE: March 7, 2011

TO: County Health Department Directors/Administrators

FROM: Shairi R. Turner, M.D., M.P.H.
Deputy Secretary for Health
Signature on file

SUBJECT: Kindergarten and Seventh Grade Immunization Status Report 2010-2011

FOR INFORMATION ONLY

Each October, all public and private schools with a kindergarten and/or seventh-grade class are required to submit reports indicating the immunization status of their kindergarten and/or seventh grade students. This information is compiled and sent to the Bureau of Immunization for tabulation. Enclosures 1 through 4 are summaries of kindergarten data, and enclosures 5 through 8 are summaries of seventh grade data for the 2010-2011 school year. This information reflects immunization coverage for 219,254 kindergarten students and 220,846 seventh grade students.

Purpose:

- To decrease the occurrence of vaccine preventable diseases by increasing immunization coverage levels among school-age children.
- To ensure the enforcement of Chapter 64D-3.046, *Florida Administrative Code*, and of section 1003.22, *Florida Statutes*, *Florida School Immunization Law*, regarding immunization. The law states students are not permitted to attend school without proper documentation. Schools permitting said students are in violation of the state law, and said students should be excluded from school until adequate documentation is provided.
- To identify those counties needing assistance in raising their immunization coverage levels in kindergarten and seventh grade to Florida's goal of at least 95%. The national goal for kindergarten and seventh grade is 95% and 90%, respectively.

Results – Kindergarten:

Statewide, 91.3% of kindergarten students were reported as receiving all immunizations (listed below) required for school entry/attendance:

- Four or five doses of diphtheria, tetanus, pertussis (DTaP) vaccine
- Three or four doses of polio vaccine
- Two doses of measles, mumps, and rubella (MMR) vaccine
- Three doses of hepatitis B vaccine
- Two doses of varicella vaccine

Of Florida's 67 counties, 37, or 55.2%, achieved or exceeded the goal of 95% or more of kindergarten students receiving all required immunizations upon school entry/attendance. Statewide, 221 students, or 0.1%, had inadequate immunizations and/or documentation of immunizations. Florida continues to work toward achieving the 95% goal.

Students with exemptions from immunization accounted for 8.6% of the total kindergarten population, as reflected below:

- 12,634 temporary medical exemptions, or 5.8%
- 734 permanent medical exemptions, or 0.3%
- 2,387 religious exemptions, or 1.1%
- 3,014 30-day exemptions, or 1.4%

Results – Seventh Grade:

Statewide, 94.7% of seventh grade students were reported as receiving all immunizations required for school entry/attendance, including but not limited to:

- Completion of the hepatitis B series
- Two doses of measles, mumps, and rubella (preferably as MMR)
- One dose of varicella
- One dose of tetanus-diphtheria-pertussis (Tdap)

Sixty-four of 67 counties, or 95.5%, achieved or exceeded Florida's goal of 90% or more of seventh grade students receiving all required immunizations. Statewide, 328 students, or 0.1%, had inadequate immunizations and/or documentation of immunizations.

Students with exemptions from immunization accounted for 5.2% of the total seventh-grade population, as reflected below:

- 8,157 temporary medical exemptions, or 3.7%
- 721 permanent medical exemptions, or 0.3%
- 1,544 religious exemptions, or 0.7%
- 1,064 30-day exemptions, or 0.5%

All exemptions, excluding permanent medical, decreased from the previous school year. The most significant rate reduction is with 30-day exemptions, being 1.2% previously.

It is important to remember 30-day exemptions should be issued to transfer students only. Inadequately immunized, non-transfer students should be permitted school entry or attendance only after presenting proper documentation of vaccination. The school health nurse or authorized school official is responsible for follow-up of children with temporary medical and 30-day exemptions; ensuring children complete the immunization series.

Collaboration between the school's health nurse and administration to update electronic submission of immunization data is encouraged. Using a reminder system to recall students in need of immunizations has shown to increase completion of the hepatitis B series, and has aided in the monitoring of Tdap.

County Health Department Directors/Administrators

*Chapter 1003.22, Florida Statutes provides for the requirement of proper documentation prior to school entry into Kindergarten.

**Florida Certification of Immunization (DH 680-Part A) is issued when (valid) 5 or more doses of any diphtheria and tetanus toxoids and pertussis vaccines including diphtheria and tetanus toxoids, and any acellular pertussis vaccine (DTaP/DTP/DT), 4 or more doses of any poliovirus vaccine, 2 doses of measles, mumps, and rubella (MMR) vaccine, 3 or more doses of hepatitis B vaccine, and two doses of varicella vaccine (or proof of serological evidence of immunity or disease history) are administered. *Four doses of DTaP and 3 doses of polio are acceptable if the last dose of each was administered on or after child's fourth birthday.*
