

**2020 Florida Behavioral Risk Factor
Surveillance System (BRFSS)
Adverse Childhood Experiences (ACE)
Report**

Ron DeSantis
Governor

Joseph A. Ladapo, MD, PhD
State Surgeon General

Introduction

The Florida Department of Health is pleased to release the results of the 2020 Florida Behavioral Risk Factor Surveillance System (BRFSS) Adverse Childhood Experiences (ACE) module. The Florida BRFSS is a statewide telephone survey that provides the only source of state-specific, population-based estimates of the prevalence of various health conditions and related risk behaviors among Florida residents aged 18 and older. The purpose of this survey is to gather information regarding personal health and risk behaviors, selected medical conditions, and preventive health care practices among Florida adults. These data can be used to: (1) determine priority health issues and identify populations at risk for illness, disability, and death; (2) plan and evaluate prevention programs; (3) educate the community and policy makers about disease prevention; and (4) support community policies that promote health and prevent disease.

The following data tables present the results from the 11 questions included in the 2020 ACE module. All questions in the module refer to events that happened during the respondent's childhood (before they were 18 years of age). Of the total of 10,567 Florida adults who completed the 2020 survey, 8,516 completed at least one question in the ACE module and are included in the prevalence estimates for the individual ACE indicators in this report. There were 7,779 respondents who completed all 11 ACE questions in the module and are included in prevalence estimates of the number of ACEs experienced (0 ACEs, 1 ACE, 2-3 ACEs or 4 or more ACEs). Responses of "once" and "more than once" to the last five questions in the module regarding the number of times a respondent witnessed physical abuse between adults or experienced physical, emotional or sexual abuse were combined and treated as equivalent to a response of "yes" for the purpose of calculating the number of ACEs experienced. Each ACE indicator was analyzed by sex, race/ethnicity, age, education, income and marital status.

All prevalence rates are weighted by the Centers for Disease Control and Prevention to represent all Florida adults. Weighting is a procedure that adjusts for the chance of an adult being selected to complete the survey and for discrepancies between the adults who completed the survey and the overall population of Florida adults. The data were weighted to the respondent's probability of selection by county, as well as age, sex, marital status, race/ethnicity, education level and housing type.

Due to a change in weighting methodology and the inclusion of cellular telephone responses starting in 2011, data from 2020 may not be comparable to data collected before 2011.

2020 Florida BRFSS Adverse Childhood Experiences (ACE) Data

Adverse Childhood Experiences

Percentage of adults who responded "Yes" to the question "Did you live with anyone who was depressed, mentally ill, or suicidal?"

		Measure	95% CI
ALL	Overall	13.4	11.9 - 14.8
SEX	Men	10.8	8.9 - 12.8
	Women	15.6	13.4 - 17.8
RACE/ETHNICITY	Non-Hisp. White	16.6	14.8 - 18.5
	Non-Hisp. Black	8.4	5.1 - 11.7
	Hispanic	10.1	6.5 - 13.6
SEX BY RACE/ETHNICITY	Non-Hisp. White Men	13.4	10.6 - 16.1
	Non-Hisp. White Women	19.5	16.9 - 22.0
	Non-Hisp. Black Men	5.7	1.7 - 9.8
	Non-Hisp. Black Women	11.1	5.9 - 16.3
